PROFILE

I am a results-oriented and resilient professional deeply passionate about software engineering and data analysis. My self-directed learning and enthusiasm for technology drive me to continually expand my skill set, ensuring that I stay at the forefront of the latest advancements. I excel in quickly adapting to emerging technologies, applying them effectively to achieve desired outcomes.

EXPERIENCES

Sep 2023 - Dec 2023

KreativeStorm, Berlin
Hands-on, Frontend Training

- Created cool, accessible, and responsive web designs to enhance user experience.
- Implemented semantic coding principles in web development to improve code clarity and SEO.
- Utilized Web Accessibility tools to design websites that cater to users with disabilities.
- Learned about Web Content Accessibility Guidelines (WCAG) to ensure inclusive web design.
- Understood the purpose, uses, and rules of WAI-ARIA (Web Accessibility Initiative - Accessible Rich Internet Applications) for enhancing web accessibility.

Aug 2022- June 2023

Fenix Outdoor Logistics, Almere
Team Support

- ·Worked with WMS like Microsoft AX and Manhattan Scale to received, processed and tracked incoming and outgoing warehouse shipments.
- ·Troubleshot errors and maintained accuracy of scanners.
- ·Located and replenished missing items in stock.

July 2022- present

Self-Learning (Online Courses)

- Completed advanced courses in SQL for Data Analytics and Business Intelligence (John Pauler on Udemy).
- Gained proficiency in the Node.js stack through courses like "The Complete Node JS Developer" (Andrew Mead on Udemy) and "The MERN Stack" (The Net Ninja on YouTube).
- Developed skills in web development using NEXT JS and Chakra UI (The Net Ninja on YouTube).

HOBBIES

Watching football

Playing Football

Video games

Gym

LANGUAGES

English   Advanced

German   Basic

Feb 2022 - June 2022

Digital School Society, Amsterdam
Digital Transformational Designer (Trainee)

- Led a team in researching how digital twin technology could address night-time heat stress in urban areas.
- Conceptualized and developed a solution to educate citizens and combat night-time heat.
- Conducted user research and co-creation sessions with Dutch homeowners.
- Served as the Scrum Master for one of the Sprints.

Dec 2018 - March 2019

Bizzdesk Group Ltd, Abuja
Software Developer (Trainee)

- I acquired foundational skills in front-end development, where I utilized the Angular framework to create dynamic applications such as an inventory management system.
- I gained exposure to back-end development by learning Java with the Spring Boot framework to develop robust backend applications.
